DETAILED ACTION

Election/Restrictions

1. This application is in condition for allowance except for the presence of claims 13-15 to an invention non-elected with traverse in the reply filed on November 04, 2005. Applicant is given ONE MONTH or THIRTY DAYS from the date of this letter, whichever is longer, to cancel the noted claims or take other appropriate action (37 CFR 1.144). Failure to take action during this period will be treated as authorization to cancel the noted claims by Examiner's Amendment and pass the case to issue. Extensions of time under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue.

The prosecution of this case is closed except for consideration of the above matter.

Response to Arguments

2. Applicant's arguments with respect to restriction requirements are fully considered but not persuasive. Applicant states that the inventions are related since they are related to an image device and have a common (399/130) subclass of classification. This argument is not persuasive because, Invention II, although classified in 399/130, requires search in other subclasses, different from the subclasses required by Invention I. Also, the Examiner considers that Invention II is different from Invention I since they have a different mode of operation. For example, Invention II is different from Invention I in that that Invention II has a plurality of photoconductors, plurality of exposure units and developing units, wherein the developer images are superimposed

on the image support member and does not require detecting density of the second developer and the particular movement of the photoconductor (by the second amount less than the first amount).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited in the PTO-892 and not mentioned above disclose related devices and methods.
